**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Double Patenting***

1. Claim 71 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 5 of U.S. Patent No. 6,797,001. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of claim 71 is considered to be obvious over the subject matter of claim 5 of the '001 patent.

One of ordinary skill in the art would know that mechanisms other than anchors could be used to fix the device in place. Such mechanisms could be sutures, or a flexible structure that hugs the surrounding tissue. Thus, a substitution of fixation mechanisms would be obvious.

***Claim Rejections - 35 USC § 103***

2. Claims 66-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Colvin et al (6,602,289).

Application/Control Number:  
10/813,354  
Art Unit: 3762

Page 3

Col. 4:15 teaches that the device of Colvin bends more readily in one direction than in another direction.

See also col. 6:13. Further, to make the bend directions in the same plane would be obvious in that by doing so the device would function better and would avoid tissue tearing. Also, to put notches on the device would have been obvious in that such reduction in structural integrity is known to make one side more flexible than another, and the ordinary artisan would be well aware of such a method to do so.

Since new rejections have been made, this action is not made final.
